

THE ROCK CYCLE POSTER

Purpose: Examine and graphically display the rock cycle and processes effecting rock formation and transformation.

Project: design a poster board illustrating the rock cycle. Study your notes and textbook or other similar source. On a single standard size poster board (roughly 24 x 36" or 27 x 39) draw the circular process and possible paths. Label and describe each step and rock category (metamorphic, igneous, and sedimentary). This is a completely hand-drawn project. Neatness and creativity count.
